

Maintaining your beautiful lake is what we do.

Aquatic Herbicide Applications

The majority of our application equipment is custom-built based on over 30 years of field experience. Our projects have ranged in size from a few acres to whole lake management encompassing thousands of acres.

Lake Management Planning

- Aquatic plant management plans
- Fisheries management plans
- Mechanical harvesting management plans
- Specific plans for private water bodies

Grant Writing

Our staff has successfully prepared dozens of successful State and Federal grants for clients totaling well over \$1,000,000. We will advise you on the likelihood of success prior to starting a project.

Point Intercept & AIS Surveys/Mapping

- Full Point Intercept surveys
- Individual species mapping
- Specialized surveys of wild rice beds for cultural purposes

Wetland Delineation

We assist in pond or property development to mitigate or reduce impacts to these important resources through full wetland delineations and reporting, including liaison with regulatory authorities and on-property concurrence.

Visit Our Swim Pond

Monday - Friday 8:00am - 5:00pm
Saturday by Appointment

Check out our pond and you'll
FALL IN LOVE
with the possibilities of
creating your own

corner of paradise

You create the

memories

we'll take care of the rest.

Professional Aquatic Consulting

Our biologists will meet with you on-site to discuss your pond concerns, collect physical, chemical, and biological data on your pond, and recommend management strategies. A professional pond consultation is the best place to start on the road to a healthy pond!

Hands-Free Management

We take the worry out of your hands by developing a customized management system for maintaining your pond or lake using Integrated Pond Management. IPM is performed in three stages: prevention, observation, and intervention. It is an ecological approach with a main goal of significantly reducing or eliminating the use of pesticides while at the same time managing nuisance aquatic growth and algae populations.

Do-It-Yourself Management

Don't risk making mistakes with your pond. WLPR will train you. Our DIY package will help you match the product with the problem, provide detailed instructions for mixing, loading and application, as well as performing calibration on your applicator and helping to determine proper application timing for optimum results. And when you purchase products from WLPR we will discount the on-site training.

Pond Treatments

When alternative methods are not effective, WPLR provides professional applications of algaecides, herbicides, and biological agents when necessary. We utilize state-of-the-art equipment with GPS guidance systems and flow control meters. Our commercial applicators are trained, licensed, and insured.

Fishery Services

We can provide fish for stocking, consulting, and management assessments/fish surveys to assist in developing a quality fishery in your lake or pond!

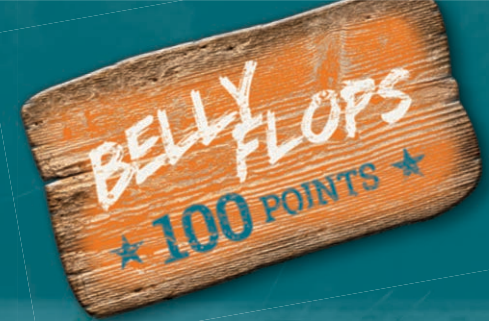

Services include:

- Basic Fish Survey
- Population Estimates
- Fish Removal
- Permit and License Requirements
- Age Structure Survey
- Complete Fish Survey
- Fish Structures

Stormwater Pond Management

WLPR provides professional management services for both municipalities and private owners including:

- Evaluations & problem identification
- Product applications & treatments
- Installation of aeration/fountain systems
- Site monitoring
- Aquatic plant management

You **WANT** a swim pond.

You **BUILD** a swim pond.

It's that simple.

It's not a hole in the ground, but rather a professionally designed and constructed oasis perfect for swimming. You can have a shoreline ready for sandcastles, or rock-lined shore ideal for meditative sitting, or both. You can have the swimming experiences you want with beaches, docks, piers, and swim rafts. You can even swim among the fish if you like.

Our design consultants will work with you through everything from site characteristics, water sources, and environmental conditions. From now on, you won't have to travel to other people's lake homes. They will come to yours.

Pond components include:

- Aeration System
- Dock
- Fish Stocking
- Decorative Fountain
- Swim Raft
- Aquatic Plantings

No wetland, spring, river or ground water? No problem!

To get the best results we use polyethylene liners that contain "5-layer construction" resulting in an incredibly strong and lightweight tear/puncture resistant material. WLPR has installed over a million square feet of pond liner in a wide range of applications.
